Stent Graft System In
Surgical Operation

Compact Design
Simplify Frozen Elephant Trunk

CRONUS™

Stent Graft In Surgical Operation

Flexible Stent Structure and Excellent Sealing Effect

- Modern weaving technique guarantees outstanding durability and resistance to deformation
- PET graft with excellent biocompatibility
- Conichrome wire with super elasticity provides stable radial strength for stable flow recovery
- Flexible stent structure ensures excellent match with the aortic wall

Convenient Deployment System

- The indented line on the handle identify the position of the stent proximal edge and the graft length to be sutured with vascular graft
- A pre-shaped curve ensures good match with the aortic wall
- Pull-wire release design achieves convenient deployment

- Fusiform tip smoothly leads the whole system trace through the narrow vascular lesions and reduces vascular injury

Applications

	110	C21110	C22110	C23110	C24110	C26110	C28110	C30110	C32110
	120	C21120	C22120	C23120	C24120	C26120	C28120	C30120	C32120
150	--	--	--	--	--	C28150	C30150	C32150	

- The nominal length corresponds to the length of the outer arch of the stent
- The surgical stent graft diameter refers to its inner diameter, and corresponds exactly with the nominal inner diameter of the artificial vascular graft
